

ETS4 Professional 4.0.6 2495 X86

Try Out **Decompilation** In Your Browser

Select a file to be decompiled and press the decompilation button.

Input

Type of Input: C Code Executable File Raw Machine Code

Input File:  (max. 10 MB)

Note: This input type is **only** for decompiling **binary** files with **no file format** containing just raw machine code (like firmware). If you want to decompile an executable binary file, like `program.exe`, use the **Executable File** input type instead.

Input File Settings

Architecture: Intel x86 ARM ARM+Thumb MIPS PIC32 PowerPC

Endian: Little Big

Section VM Address: (format: 0xYYYYYYYY)

Entry Point Address: (format: 0xYYYYYYYY)

When in doubt, see the [help](#).
